

Amendments to the Claims:

The following listing of the claims replaces and supersedes all previous listings.

1. (Currently amended) A security paper for producing value documents, including a creasable, foldable, multilayer substrate largely having a feel and sound of paper and comprising at least one paper layer coated with ~~film~~ foil on both sides all over, characterized in that at least the ~~film~~ foil is equipped with at least one security feature.
2. (Previously Presented) A security paper according to claim 1, characterized in that the paper layer is interrupted.
3. (Currently Amended) A security paper according to claim 1, characterized in that the security feature of the ~~film~~ foil is selected from a printed image, diffraction structures, a metallization, luminescent substances, thin-film elements, liquid crystals, magnetic pigments, thermochromic substances, photochromic substances and dyes.
4. (Previously Presented) A security paper according to claim 1, characterized in that the security feature is a printed image executed by intaglio printing.
5. (Currently Amended) A security paper according to claim 1, characterized in that ~~in the case of a plurality of films, they~~ the foils on different sides of the paper layer have are under different ~~stretch~~ strains.

6. (Currently Amended) A security paper according to claim 1, characterized in that the security paper comprises annual plant fibers.

7. (Currently Amended) A security paper according to claim 1, characterized in that the security paper comprises at least partly of synthetic fibers, ~~preferably polyamide fibers.~~

8. (Currently Amended) A security paper according to claim 1, characterized in that the paper ~~ply~~ layer is equipped at least with a security feature.

9. (Currently Amended) A security paper according to claim 1, characterized in that the security feature in the paper ~~ply~~ layer is a watermark.

10. (Currently Amended) A security paper according to claim 1, characterized in that the security feature of ~~the paper layer~~ is selected from a security thread, printed image, diffraction structures, a metallization, luminescent substances, thin-film elements, liquid crystals, magnetic pigments, thermochromic substances, photochromic substances and dyes.

11. (Currently Amended) A security paper according to claim 1, characterized in that ~~the~~ security features of at least one of the paper layer, the ~~film~~ foil or further layers are applied or incorporated in register.

12. (Currently Amended) A security paper according to claim 1, characterized in that ~~the~~ security features of at least one of the paper ~~ply~~ layer, the ~~film~~ foil or further layers

are applied or incorporated such that they complement each other to form ~~total~~ information a security feature configured for self authentication.

13. (Previously Presented) A value document characterized in that the value document has a creasable substrate according to claim 1.

14. (Currently Amended) A method for producing a creasable security paper according to claim 1, characterized in that

a) at least one paper layer is produced in a paper machine, and
b) then ~~film~~ foil is applied to both surfaces of the paper layer all over, the ~~film~~ foil being already equipped with at least one security feature or equipped therewith after application.

15. (Currently Amended) A method according to claim 14, characterized in that the ~~film~~ foil is printed after application.

16. (Previously Presented) A method according to claim 15, characterized in that the printing process is intaglio printing.

17. (Currently Amended) A method according to claim 14, characterized in that the ~~film~~ foil is cold-laminated on the paper layer.

18. (Previously Presented) A method according to claim 17, characterized in that a water-soluble laminating adhesive is used in cold lamination.

19. (Currently Amended) A method according to claim 14, characterized in that the ~~film~~ foil is extruded onto the paper layer.
20. (Previously Presented) The security paper of claim 1 wherein said value documents are bank notes or checks.
21. (Previously Presented) The security paper of claim 6 wherein said annual fibers are cotton fibers.
22. (Previously Presented) The value document of claim 13, comprising a bank note or check.
23. (New) A security paper of claim 7, wherein the synthetic fibers are polyamide fibers.
